# Easy Access

With fantastic access, Sagamihara really is an inland hub city!

Sagamihara is a city constantly striving for economic development and improvement in standards of living. In addition to easy access to major cities and Haneda Airport, access to the Chubu and Kinki regions of Japan is expected to improve with the opening of the "Linear Chuo Shinkansen". Sagamihara is also home to the asteroid probe "Hayabusa". Come and create your own destiny here in Sagamihara, a city connecting you to Japan, the world, and outer space!

A city that connects you with outer space

## To SPACE

Now boarding for outer space. The destination? The future!

Yamanashi Pref

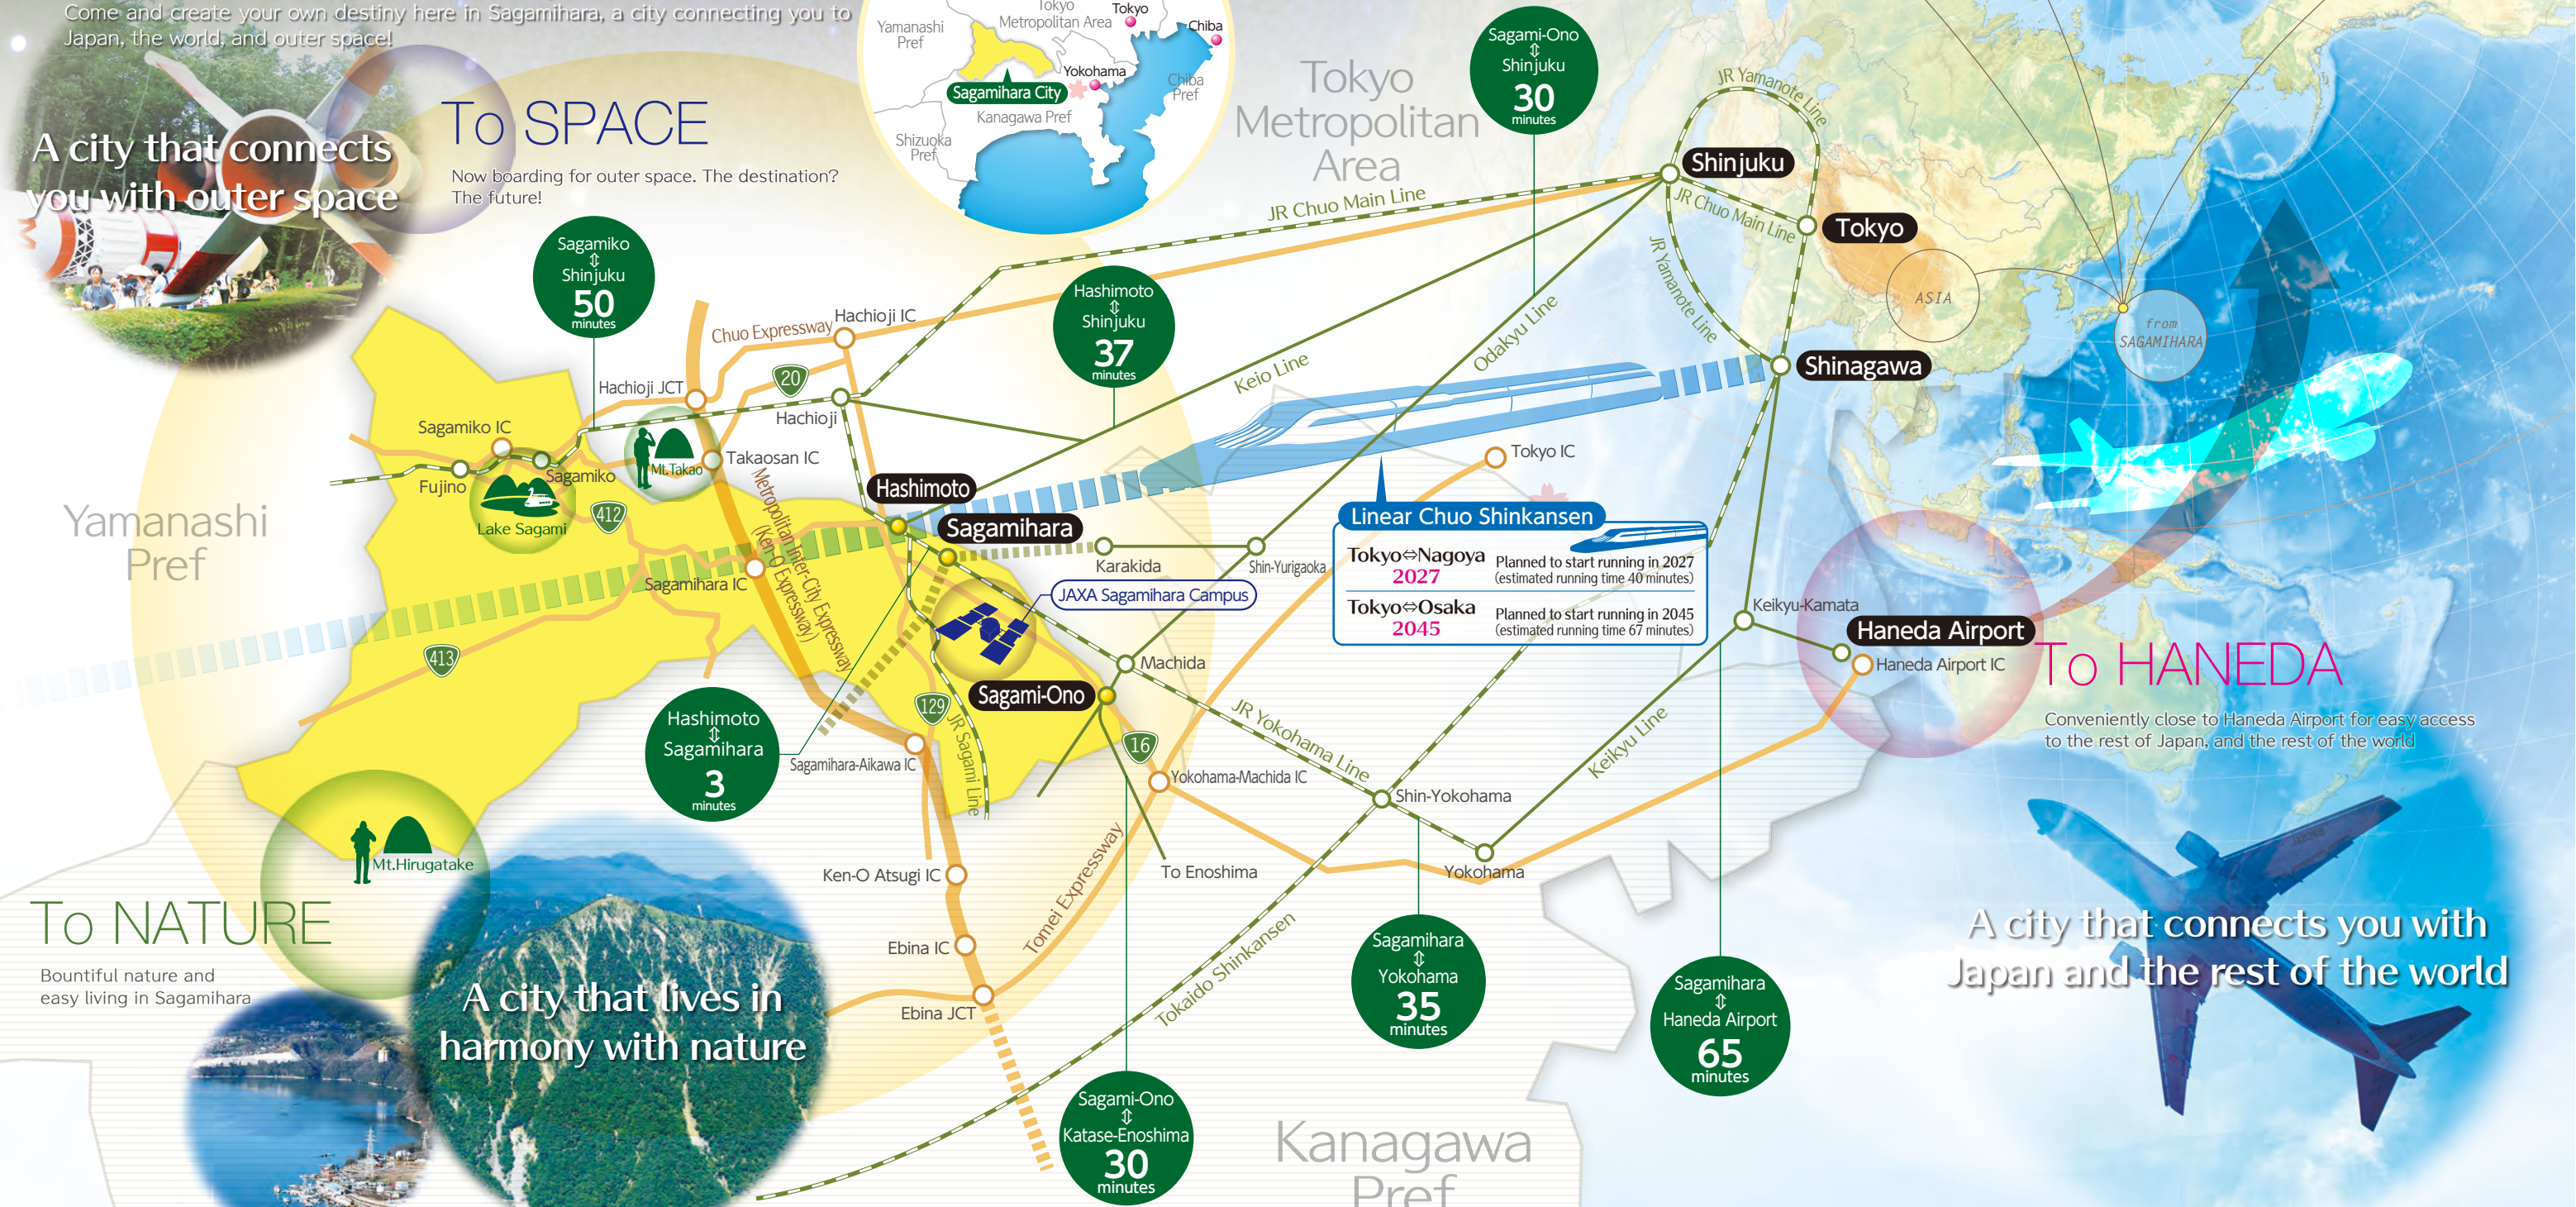

## To NATURE

Bountiful nature and easy living in Sagamihara

A city that lives in harmony with nature

Tokyo Metropolitan Area

# Future

New city planning for a brighter future

Sagamihara is a city that promotes itself as an "inland hub city" and an "advanced living city". Through the fulfillment of a wide-area network, maintenance of the city center, and the establishment of a new production base, we are aiming to create a city that is "fun to visit", "pleasant to live in" and "attractive to business". Why not come and experience the great lifestyle Sagamihara city has to offer?

**The Sagamihara station area** (a model city for exchange in the 21st century)  
We are considering a city planning project whereby a culture and information precinct equipped with event spaces, and business, commerce and international relations facilities will be built on a part of the Sagami General Depot that was returned to Japan by the US military.

**The Sagami-Ono station area**  
The redevelopment of this building brought about growth in the city and an improvement in customer circulation. Over time, has continued to make the area around the station an increasingly vibrant place.

# Space

Into space, into the future, and into your dreams - Sagamihara

Sagamihara is the birthplace of the Hayabusa asteroid probe. Developed at the JAXA Sagamihara Campus, the Hayabusa probe was built to land on the surface of the Itokawa asteroid, collect samples, and return to earth. Why not come and see what's going on with Japan's cutting edge space exploration program?

# Sakura

Sagamihara - Our future is a cherry blossom in bloom

The arrival of spring paints the city in a sea of pink. From the Gakudo cherry trees of Midori-Ward, to the cherry tree lined thoroughfare by the city hall in Chuo-Ward, to the moss phlox of Minami-Ward, Sagamihara is brimming with beautiful cherry blossom scenery. Why not pay a visit to our beautiful city?

**Gakudo Cherry Trees**  
Gakudo cherry trees, originally taken to Washington D.C. by Yukio Ozaki (Gakudo) as gifts, have come home to Sagamihara after all these years. Planted in the Ozaki Gakudo Memorial Hall, they burst into bloom during spring and bathed the area in pink.

Sagamihara x

# Culture

Sagamihara is a city of art, sports and events. Sagamihara continues to be a rich culture center, through the holding of established events like the Photo City Sagamihara General Photo Festival and outdoor artwork displays, as well as new cultural events in planning. Why not come and experience a little culture here in Sagamihara?

# Nature+Water

Sagamihara is a city rich in nature and brings a smile to every face

Sagamihara is a city abundant in water. Originating from five different lakes, the Sagami river in all its natural beauty, enriches the lives of the people of Sagamihara city. Why not take a short trip down from the city to experience the beauty that the Sagami river bestows on this area?
